THE VIRAL DELUSION

The Tragic Pseudoscience of SARS-CoV2 and the Madness of Modern Virology

A NEW DOCUMENTARY SERIES MARCH 21

www.TheViralDelusion.com

In Episode One, the doctors, scientists and journalists featured in THE VIRAL DELUSION examine in detail the scientific papers that were used to justify the pandemic, and what they find is shattering: they explode every single major claim, from the "isolation" of the virus to its so-called genetic sequencing, from the discovery of how to "test" for SARS-CoV2 to the emergence of "variants" that in reality, they explain, exist only on a computer. Their point: that the so-called SARS-CoV-2 virus exists only as a mental construct whose existence in the real world has been disproven by the science itself.

They then go back through history to reveal how the birth and growth of virology has led to massive misunderstanding and misdiagnosis of disease: from Smallpox to the Spanish Flu, Polio to AIDS, to COVID itself - putting the pandemic in a whole new context better understood not as settled science, but the tragic culmination of misunderstood biology by the growing cult of virology, built on pseudoscience, to which much of the rest of the medical profession defers without understanding or examination, and the tragic consequences that have been wrought in its name.
