

## **April 2010:**

Can a dissolution test be used for assay and content uniformity testing? Of course!

PVT and dissolution testing of products

Should there be drug specific dissolution methods or tests?

Is the use of sinkers in drug dissolution testing valid – Maybe not!

Generics and discriminatory dissolution tests

Do the current practices of dissolution testing serve their purpose? Maybe not!

A dissolution test – a QC test or is it?

De-aerating/de-gassing a dissolution medium – Why?

Is 0.1N (or 0.01N) HCl a relevant dissolution medium?

In Vitro- In Vivo Link

Dissolution medium volume – how much is appropriate?

PVT – what is the newness or improved usefulness or relevance?

## **March 2010:**

“Discriminatory testing” terminology requires clarity

F2 – Similarity Factor

Left over particles in the basket apparatus

A dissolution test – a QC test or is it?

Validation (Method/Apparatus) Practices

Selecting an apparatus and its associated experimental conditions for testing

Paddles/Baskets – Should their use be continued?

Dissolution testing as an extraction technique
